BeefMeet

Education Networking Policy District Meetings

BeefMeets will provide educational and networking opportunities for each region. As day long events, the BeefMeets will combine the electoral and grassroots discussions that take place at ICA regional and district meetings, while offering a tradeshow and educational sessions. This collaboration will provide an opportunity for districts to get together every year rather than just when they have an election. For districts that have an annual, well known district meeting with strong attendance, we would still encourage those districts to hold their meeting.
